

C3 Washroom Cleaner

doseit
by CLOVER

- Dosage control pack
- Cleans and descales in one operation
- Bactericidal - Kills bacteria - passes BS EN 1040:2005
- Leaves a fresh modern fragrance

USES

A concentrated, acidic liquid, C3 can be used for cleaning and descaling general washroom surfaces. The red liquid contains safe citric acids to clean and remove limescale and organic deposits in one operation. Available in a 1 litre dosage control pack.

Use C3 to clean toilets, urinals, sinks, baths, showers, tiles and washroom floors.

C3 is safe for use on porcelain, stainless steel, chrome, ceramic and tiled surfaces.

1 Litre of C3 Washroom Cleaner will create 50 trigger bottles or 25 buckets of ready to use solution.

DILUTIONS

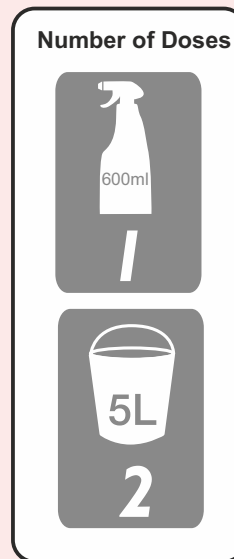

When using the bottle for the first time, the dosage control cap needs to be primed with its first dose of product. Invert the bottle for 3 seconds. Now the product is ready to dose its first 20mls.

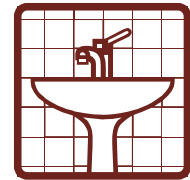

Lift the flip-top cap and invert the bottle to dispense a 20ml dose of product into a trigger bottle or bucket as required.

After dosing, turn the bottle upright and dose again!
